Swami Dayanand Saraswati Higher Secondary School

Feb.2021 - Feb.2022

Projects

Smart Contact Manager

- Built a smart contact manager with image storage, fast search, and a responsive user dashboard.
- Implemented secure OAuth login with Google and GitHub along with email verification to protect user accounts.
- Enabled export of contact lists into Excel format to facilitate data portability and offline record-keeping.
- Tech Stack: Java, Spring , Spring Security, Spring Data JPA, structured using the MVC architecture.

Votezy

- Designed a secure voting platform allowing candidates and voters to register, cast votes, and view results.
- Enforced voting rules to prevent double voting and disallowed votes for non-existent candidates.
- Blocked unregistered users from casting votes to ensure only verified voters can participate in elections.
- Tech Stack: HTML, Bootstrap, JavaScript, Java, Spring Boot, Spring Data JPA, and MySQL database.

Technical Skills

Languages: C++, Java, JavaScript

Web Development: HTML, CSS, Bootstrap, GSAP, JEE, Spring & Spring Boot

Tools: VS Code, IntelliJ IDEA, NetBeans, STS, Postman, Git, MySQL WorkBench

Academic Coursework

Object-Oriented Programming

Data Structures

Database Management System

Operation System

Achievement

- Solved 200+ problems on LeetCode & GFG
- NPTEL - Database Management System
- NPTEL - Programming in Java (77%)
- Introduction to Generative AI (Coursera)
